John,

Does this mean you want us to cancel our conf call for tomorrow at 2:00 and arrange one with Tom Instead?

John,
Let me check on that and I'll get back to you.

Tim

The NRC staff is exploring actions that were identified in the LLTF, including:

"(16) The NRC staff should open a dialogue with the States regarding the application of the NPDES system to discharges of radioactive materials to promote a common understanding of how the associated legal requirements in this area are addressed (Section 3.2.3)."

To this end, could you provide examples of NPDES permits that have been applied to discharges at IPEC.
