Subject: New proposed license condition

We reviewed the lease that was provided with your letter dated January 17, 2007 (AET 07-0002). We reviewed the lease to determine if there would be any impact on licensed operations. The lease is for an initial period that ends on June 30, 2009, but contains provisions for renewals that could extend the lease beyond the requested 30 year license term. The lease also contains provisions that would allow DOE to terminate the lease. Because these provisions could potentially impact licensed operations, we are proposing the following license condition:

With respect to the lease for the ACP facilities entitled "Supplemental Agreement No. 1 to the Lease Agreement Between the United States Department of Energy and the United States Enrichment Corporation" dated December 7, 2006, the licensee shall:

- A. Provide to the NRC a copy of the written notice that is required to be provided to the DOE regarding lease renewal at the same time that it is provide to the DOE;
- B. Provide to the NRC a copy of the written notice that is required to be provided to the DOE regarding the licensee's decision to terminate the lease at the same time that it is provide to the DOE;
- C. Inform the NRC within 24 hours upon being informed by DOE that it is terminating the lease; and
- D. Provide to the NRC a copy of any modifications to the lease within 30 days of the modification being signed.

Please let me know if you have any questions or comments.
