NMCS/FGN MATERIALS-001

Please add the following as Authorized Users:

- Dennis E. Line, MD 35.200
- Steven R. Jones, MD 35.200

Training and experience required for their inclusion on our license may be referenced on NRC License 37-16554-01

Please add the following as Authorized Users:

- Christopher Spizzieri, MD 35.200; 35.500

His training and experience may be referenced on NRC License 37-28696-01

Please make the following changes.

- Authorized User Elias Najern, MD should be read Najem.
- Please change the last name of the Radiation Safety Officer on this license from McGuire to Tischbein. This change is a result of marriage.

Please remove item G.

Any Byproduct material identified in 10 CFR 31.11; Prepackaged kits; As needed

The RIA lab has not existed in the PinnacleHealth system since 1996. Prior to the labs closure:

- I 125, I 131, and Fe 59 were used. All remaining kit's containing this material were stored for the required 10 half lives and then disposed of.
- C 14 and Se 59 were never used.
- H 3 exists only in the form of an exempt quantity equipment check source.

Please remove items I and J.

*Strontium-90/Yttrium-90; Sealed sources; Novoste Beta-Cath System
Iridium-192; Sealed Sources; Cordis Checkmate Catheter System*

This equipment was never used by PinnacleHealth System. We amended our license with the expectation of purchasing the equipment and sources. For a variety of reasons, we never did. It is extremely unlikely that we ever will.

Sincerely,

William K. Wilkison
Vice President
Ambulatory Care and Ancillary Services
