## SUBJECT

Control No. 315839 -- Re change of Radiation Safety Officer (RSO) for License No. 13-24550-01.

## SUMMARY

In our telephone conversations on this date, I related to Ms. Harris the need to provide additional/updated information regarding licensee request to name Mr. Chuck Parke as the replacement RSO for Gene Sinclair. She related that current plans are to name Mr. Chuck Parke only as an interim RSO, until they send another employee to a gauge vendor training course, scheduled for a date in February or March of this year. I noted from my review of information submitted for previous amendments, that the vendor performed gauge installations and ongoing testing and servicing of the gauges, other than the routine collection of wipe test sample for analysis by the vendor. Ms. Harris confirmed this is still the their practice. Also, it was noted during this review that the licensee has not possessed a survey meter nor have licensee personnel been provided personnel monitoring devices. She related that this remains their practice. I noted that in my previous discussions with Mr. Parke, that he has had many years experience around the gauges including the collection of routine wipe test sample as well as annual training presented by the former RSO, Mr. Gene Sinclair, on gauge usage and lock-out procedures. Ms. Harris agreed to confirm in writing by February 5<sup>th</sup>, the above information, including the name of the licensee individual to be sent to the gauge vendor training course, and the date that the course is to be presented, with the understanding that the licensee will request a followup amendment at that time, to name that individual as the new RSO.
