Al:  
I passed along the 20.6 pCi/m2s radon flux reading on the large  
tailings pile to Bob Evans, R IV inspector (the radon flux survey and  
std of 20 pCi/m2s required by LC 36E). Please read LC 41 and make sure  
you are in compliance. I don't know if this qualifies as a "spills,  
leaks, excursions, and incident/event" or not, but if so, you need to  
call RIV, if you haven't already done so, to report. There also is a  
requirement for written report w/in 30 days to NRC HQ & RIV if this is a  
"spills, leaks, excursions, and incident/event".
