Mr. C. Scott Eves, Vice President  
Environmental Services  
Shieldalloy Metallurgical Corporation  
West Boulevard  
P.O. Box 768  
Newfield, NJ 08344

SUBJECT: REQUEST FOR ADDITIONAL INFORMATION REGARDING BAGHOUSE DUST SAMPLING (TAC No. L30926)

Dear Mr. Eves:

The staff is currently reviewing your submittal dated June 24, 1996, regarding your request for the domestic sale of baghouse dust from your Newfield facility. In your submittal, Shieldalloy Metallurgical Corporation (SMC) states that sampling of the baghouse dust would be performed prior to the dust being shipped off-site to ensure that the source material content is less than 0.05% by weight. Before the review of this request can be completed, the NRC staff requires additional information on the sampling of the dust. Please submit your proposed sampling plan for this activity. This detailed plan should indicate the number of samples that will be taken per volume of dust shipped, the methodology for collecting and analyzing the samples, the instruments to be used in the analysis, and the type of documentation that will be kept.

If your request for the domestic sale of the baghouse dust and the baghouse dust sampling procedures are approved, the staff intends to amend License No. SMB-743 to include the submitted sampling plan.

If you have any questions, please call me on (301) 415-5819.

Sincerely,

Heather Astwood
