U.S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, DC 20555

Limerick Generating Station, Units 1 and 2
Facility Operating License Nos. NPF-39 and NPF-85
NRC Docket Nos. 50-352 and 50-353

Subject: Withdrawal of Proposed Alternative Associated with the Second Ten-Year Interval
Inservice Testing (IST) Program – Relief Request No. 51-VRR-3

Reference: Letter from P. B. Cowan (Exelon Generation Company, LLC) to U. S. Nuclear
Regulatory Commission, dated October 10, 2006

In the referenced letter, Exelon Generation Company, LLC (EGC), requested relief from the American Society of Mechanical Engineers (ASME) OM Code, 1990 Edition, "Code for Operation and Maintenance of Nuclear Power Plants". Specifically, this relief request proposed an alternative for Limerick Generating Station (LGS), Units 1 and 2, that would have permitted testing (i.e., disassembly, inspection, and partial flow testing) of Residual Heat Removal (RHR) System check valves during any plant mode (Relief Request No. 51-VRR-3).

Upon further review, EGC is withdrawing this request.

If you have any questions, please contact Thomas R. Loomis (610) 765-5510.

Very truly yours,

Pamela B. Cowan
