Sir:

The system is now working OK. Over the long weekend there certainly were problems. Usually, when there are difficulties, the system posts an alert message. You may wish to look into this.

Sir:

On September 19, 2006, I sent you a copy of the following e-mail that was addressed to Kathleen Trever, DEQ, Idaho. You responded to my request to place the referenced documents in the PDR . ML062650095, 2006-09-19, 29 pages, appeared in the ADAMS files. I have recently referenced ML062650095 in my blog, <http://nuclearenergyblog.blogspot.com>. Today, I am not able to find ML062650095 via ADAMS.

What is going on?

Bob Leyse

*Kathleen:*

*Five years ago we had e-mail exchanges regarding the Columbia Generating Station. You contacted the NRC and they correctly responded that Columbia was well aware of the situation at the River Bend BWR in Louisiana (fouling of fuel elements). Of course, as usual, the NRC (and Columbia) did not elaborate.*

*The other day I was crawling around GOOGLE and I stumbled across the following:*

*[www.energy-northwest.com/downloads/Main%20Condenser.pdf](http://www.energy-northwest.com/downloads/Main%20Condenser.pdf)  
and*

*[www.energy-northwest.com/downloads/Main%20Condenser%20Addendum%201.pdf](http://www.energy-northwest.com/downloads/Main%20Condenser%20Addendum%201.pdf)*

*I do not believe that Columbia intended for these to hit the fan, but they are out there.*

*So, to finalize. INL is the center for Nuclear Power Technology in the USA. The INL experts, independent of EPRI, should look into the situations that are outlined in these two documents. My belief is that Columbia has postponed tube replacement in the main condenser for too long.*

*In the hands of experts the two documents will speak for themselves. So, please let me know what INL thinks about all this.*

*The Chairman, NRC should insure that NRC is aware of the two referenced documents and that they are placed into the PDR.*

*Bob*
