Item No. 14, Form AEC-313, Continued: Radioisotope compounds are received precalibrated from Abbott Laboratories, stored in a lead brick lined iron safe in a locked room until ready for use. The material is monitored from safe to patient. The laboratory is monitored each day isotopes are used for spills or leaks.

Item No. 15, Form AEC-313, Continued: Waste material is kept in a safe room until it has deteriorated to a safe level and then discarded down the sink well diluted with water from the tap, into the common sewerage system.

All items will be held strictly within the limits prescribed in Title 10 and appropriate records (both personnel exposure and disposal of waste) will be maintained.
