U. S. Nuclear Regulatory Commission
ATTN: Document Control Desk
Washington, DC 20555-0001

Hope Creek Generating Station
Facility Operating License No. NPF-57
NRC Docket No. 50-354

Subject: Withdrawal of 10 CFR 50.55a Request P-04

Reference: 1) PSEG letter LR-N06-0394, Inservice Testing (IST) Program - Third Ten Year Interval, October 12, 2006

In Reference 1, PSEG Nuclear LLC (PSEG) requested approval of proposed alternatives to the requirements of the American Society of Mechanical Engineers Code for Operation and Maintenance of Nuclear Power Plants, 2001 Edition through 2003 Addenda, for the third 10-year inservice testing program interval for the Hope Creek Generating Station. Reference 1 included six proposed alternatives.

After discussion with the NRC staff, PSEG has elected to withdraw one of the alternatives proposed in Reference 1, 10 CFR 50.55a Request P-04.

If you have any questions or require additional information, please contact Paul Duke at 856-339-1466.

Respectfully,

A handwritten signature in black ink, appearing to read "Jamie Mallon".
