RE: Docket No. PRM-51-10 - Support The Massachusetts Attorney General's Petition for Rulemaking-Spent Fuel

I support the Massachusetts Attorney General's Petition for Rulemaking.

Specifically, I support the Attorney General's conclusions that, the Nuclear Regulatory Commission should:

(a) Consider new and significant information showing that the NRC's characterization of the environmental impacts of spent fuel storage as insignificant in the License Renewal GEIS is incorrect,

(b) Revoke the regulations which codify that incorrect conclusion and excuse consideration of spent fuel storage impacts in NEPA decision-making documents,

(c) Issue a generic determination that the environmental impacts of high-density pool storage of spent fuel are significant, and

(d) Order that any NRC licensing decision that approves high-density pool storage of spent fuel at a nuclear power plant or any other facility must be accompanied by an EIS that addresses (i) the environmental impacts of high-density pool storage of spent fuel at that nuclear plant and (ii) a reasonable array of alternatives for avoiding or mitigating those impacts.

We know that this rule change is important to better protect the Commonwealth's public health and safety and that new and significant information, e.g., the events of 9/11 and the President's statement that nuclear power plants are on terrorist's lists, has evolved since the rule was written.
