COMMENTS OR SUGGESTIONS:

Thank you for answering these questions.

Furnish current feedback forms for the public to fill out. This one is expired (see below) How do we know that our feedback forms won't be summarily trashed because they are "expired"? Make the Hearings Transcriptions available for the public to peruse - how do we know that our comments were accurately recorded? Provide responses to public comments. (ie to those opposed to license renewal) When, e.g., we express our dismay over nuclear waste being dangerous for 250,000 years, and there is no response, feelings are generated that are not favorable to

Continue Comments on the reverse.

COMMENTS OR SUGGESTIONS: (Continued)

the NRC nor to ~~ENR~~ ~~ENVY~~ ENVY
One could even conclude that these NRC hearings
are shams, Charades.

The National ~~Science~~ Academy of Sciences - BEIR VII
Report states that no amount of radiation is safe.
The radiation routinely produced by VY, let alone the
plutonium, cesium, tritium and "D.V." are, therefore
not safe.

Why are otherwise intelligent people supporting an industry that
condemns 10,000 future generations to illness and death
that is "untimely illness and death!"
