Re: Addendum to Letter of April 22, 1987

Dear Merri:

Please excuse Shieldalloy's oversight in not having forwarded eight copies of our April 22, 1987 response to the NRC's letter of December 11, 1986. Attached are nine copies of the above mentioned letter, your letter of December 11, and three immediately available copies of the topographic map (topo) which I believe is referenced only in responses 34 and 35.

For those not receiving a copy of the topo, much of the information requested can be seen on the enclosed Figure 3 (Aerial Photograph).

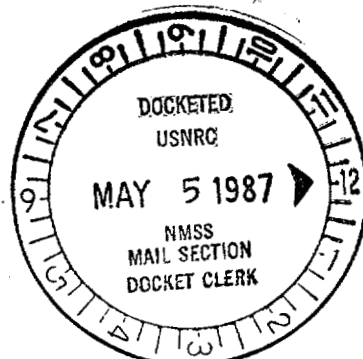

Without the topo, my response to question 35 would be that runoff from the slag area appears to flow to the Hudson Branch.

Sincerely yours,

SHIELDALLOY CORPORATION
