Comments for inclusion:

1) please review the issue of the flood plain. Since the original license was issued there has been new and significant information regarding the flood plain. In 2004 FEMA issued new flood plain maps for the entire Connecticut River. Please reconsider this in your environmental review impact.

2) Of the 302 SAMAs, please break down the 236 by reason they were screened out. i.e. how many for design differences (not applicable at VP), because they have already been mitigated by VP, how many addressed by a similar SAMA.

Thank you - ~~The Hon~~ Rep. Sarah Edwards  
Sen. Jeanette White
