Mr. J. E. Dyer, Director
Office of Nuclear Regulation
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555-0001

SUBJECT: REVIEW OF OYSTER CREEK LICENSE RENEWAL APPLICATION

Dear Mr. Dyer:

The review, by The Nuclear Regulatory Commission (NRC), of the above application is faulted and incomplete. Cite the following:

1. The required public hearings have been woefully incomplete. Many concerned, and affected people, have not been able to participate in these hearings. Take me for example. I live about three miles from the Nuclear plant. I am disabled. I cannot drive a car; I cannot walk. I am confined to a wheelchair. I am unable to attend, and participate, in the public hearings. There are hundreds of elderly, similarly disabled people unable to express their concerns about the plant, particularly about evacuation. We would be difficult, if not impossible, to evacuate. Are we doomed?
2. The law specifically calls for drills to prepare people for possible evacuation. I have lived in the area for 40 months and have never participated in, or even heard of a drill. No one knows the siren code signifying the directive to evacuate. I've polled my neighbors, and none of them have ever heard of a drill.
3. We have had a very knowledgeable and experienced nuclear engineer at Oyster Creek - Dennis J. Zonnoni. He was inappropriately dismissed from his position by an anonymous source at the NRC.

The NRC is not behaving appropriately - not "by the book." Kindly take charge and address the items listed above. Let me know the results of your actions.

Sincerely,

cc: Neil Sheehan (NRC)
Kent Tosch, Chief, NJ DEP; Bureau of Nuclear Engineering
The Honorable James Saxton, US House of Representatives
