SUBJECT

Follow-up regarding shutdown of generator production

SUMMARY

The licensee completed media fills and the samples are incubating. The licensee is planning on re-starting generator production on 4/2/07; however, generator production may be re-started on 3/25/07. The licensee agreed to contact the NRC if it plans to re-start generator production on a day other than 4/2/07.

The licensee offered Bristol Myers/Squibb (BMS) its molybdenum-99 supply, but BMS declined. BMS is currently supplying about 100% of the generator market.

ACTION REQUIRED

Place in ADAMS.**Brief Darrel Wiedeman**
