RE: N.R.C. license (#37-30619-01)
Valley Advanced Imaging, LLC

Ms. Ulrich,

Sandy Gabriel of the medical licensing branch suggested that I contact you to expedite an amendment for our facility.

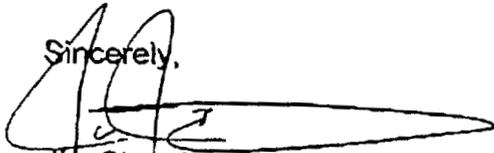

We recently ordered a Cs-137 reference source for our dose calibrator and found that our supplier offers sources above our 200uCi possession limit. As a result, we request that you amend our license to allow for a 250 uCi possession limit to remain compliant with our license commitments.

The Cs-137 source in question will be used for quality control purposes only.

Please send all correspondence to our site at 2403 Butler Street, Easton, PA 18042

If you have any questions, please contact our Radiation Physicist, Mark Liddington at 610-873-2790.

Sincerely,

Jim Stuppino
President / CEO
