If you use the magnifying glass feature on your computer you can get quite close up to the rock faces at the Trap Rock Quarry.

The first 3 photos of this photo set are not the Trap Rock Quarry.

No visible water weepage was observed on the Trap Roc Quarrru North rock face during this field observation date ( November 14, 2006)

PS:

If you do not have an IPEC compatible computer link, you may or may not be able, to see these photos.

A CD disk will be made for the NRC use if these pictures are not viewable in their current format.
