Gentlemen:

The NRC staff anticipates commencing technical review of your license renewal application dated July 18, 1988, upon receipt of your site-wide characterization report. Since the environmental information contained in the Environmental Information Outline, dated March 10, 1986, may be outdated in certain areas, we request that you submit preferably a revised environmental report or change pages. Include in your submittal, any needed revisions to your responses, dated April 22, 1987, and September 2, 1987, to our comments dated December 11, 1986. We expect the revisions to be minor. Please submit the requested information by June 1, 1992.

If the proposed date cannot be met, please let us know before April 30, 1992. I may be reached at (301) 504-2669.
