Rockville, MD 20852

South Texas Project
Units 1 and 2
Docket Nos. STN 50-498 and STN 50-499
Withdrawal of Proposed Change to Technical Specification 3.8.3.1,
"Onsite Power Distribution – Operating"

Reference: Letter from M. A. McBurnett to NRC Document Control Desk dated
January 31, 2006, "License Amendment Request - Proposed Amendment to
Technical Specification 3.8.3.1" (NOC-AE-06001970).
[TAC Nos. MC9707 and MC9708]

STP Nuclear Operating Company (STPNOC) hereby withdraws the referenced proposed amendment to South Texas Project Units 1 and 2 Operating Licenses NPF-76 and NPF-80. The proposed amendment would have extended the Allowed Outage Time (AOT) for an inoperable Class 1E vital 120-vac inverter from 24 hours to 7 days.

STPNOC currently has a broad-scope risk-managed Technical Specification (TS) amendment request with the NRC for review that addresses the TS 3.8.3.1 Allowed Outage Time. Therefore, a specific TS 3.8.3.1 amendment request is not needed.

There are no commitments in this letter.

Please contact James Morris at (361) 972-8652 or me at (361) 972-7136 if you have any questions regarding this matter.
