REGION I

Subject: Termination of all activity.

To Whom It May Concern:

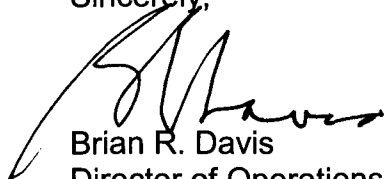

This letter is a formal declaration of our cessation of all activity involving radioactive materials, as per our NRC license. We have halted our program described in the license using radioactive  $^{32}\text{P}$  nucleotides, and have no plans to use radioactive material again. In fact, the last purchase of such material was back on August 3, 2006 of 250 $\mu\text{Ci}$  of Redivue 5'-[ $\alpha$ - $^{32}\text{P}$ ]-dATP. All solid and liquid wastes were disposed of according to the conditions in the NRC form 374 for  $^{32}\text{P}$  isotopes sent with our license. Usage and disposal logs will be maintained by the RSO for 3 years as required. Wipe tests were recently performed (March 9, 2007) on all possible exposure areas to ensure that no traces could be detected. The wipe tests were analyzed by the Atomic Energy Industrial Laboratories of Houston, TX, and were shown to be clean. See attached forms from AEIL as proof.

Since we will no longer will have an active NRC license, we formal request a refund of our 2006-2007 annual licensure fee, pro-rated. Speaking with Brenda back on 12/13/06 about our Small Entity status (#3A), we were told that this fee could be refunded in part, upon notification of the NRC of our intent to cease activities. Please send the check to the above address.

We will soon be closing our operations here at FIDR, so please respond to this matter as soon as possible. All mail will be received by our Accounts Payable department.

Thank you for your time. If you or the Commission has further questions, please contact the RSO, Jonathan Rosenberg at 609-439-2427.

Sincerely,

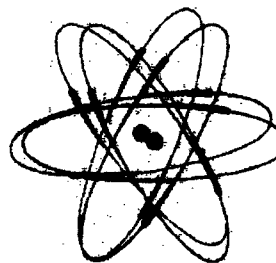

Brian R. Davis  
Director of Operations,

## CERTIFICATE OF LEAK TESTS

This is to certify that the encapsulated sources identified below were leak tested on March 09, 2007 and found to contain less than 0.005 microcurie of removable contamination on the sealed source. This amount is within the limit acceptable by the U.S. Nuclear Regulatory Commission and Agreement States.
