NRC Docket No. 70-3103

Subject: Changes to License Basis Documents

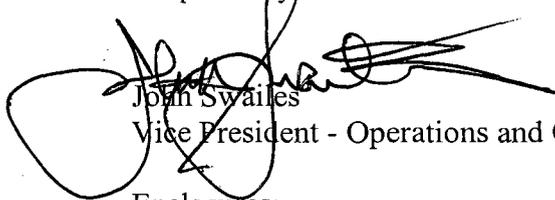

References: 1. Letter NEF-06-00032-NRC, National Enrichment Facility (NEF) FOCI Package Update, dated November 21, 2006

The limited partnership interests in Louisiana Energy Services (LES) that existed prior to the issuance of the Materials License were terminated upon issuance of the license. LES is now wholly owned by the General Partner, Urenco Ltd. In addition, the company president has changed from Mr. E. James Ferland to Mr. Reinhard Hinterreither.

Changes to the Standard Practice Procedures Plan (SPPP) for the Protection of Classified Matter to reflect these changes were submitted in Letter NEF-06-00032-NRC, National Enrichment Facility (NEF) FOCI Package Update. Similar changes are required to the Safety Analysis Report (SAR) and the Environmental Report (ER). Enclosed with this submittal are markups of the affected pages as well as replacement pages for the documents along with page removal and insertion instructions for the SAR and ER.

If you have any questions, please contact Mr. Stephen Cowne at 505.394.4646.

Respectfully,

John Swailes
Vice President - Operations and Chief Nuclear Officer

Environmental Report, Annotated Pages

There are no changes on this page. This page is included for continuity.

1.0 INTRODUCTION OF THE ENVIRONMENTAL REPORT

This Environmental Report (ER) constitutes one portion of an application submitted by Louisiana Energy Services (LES) to the Nuclear Regulatory Commission (NRC) for a license to construct and operate a gas centrifuge uranium enrichment facility. The proposed facility, the National Enrichment Facility (NEF) will be located near Eunice, New Mexico, in Lea County. The ER for this proposed facility serves two primary purposes. First, it provides information that is specifically required by the NRC to assist it in meeting its obligations under the National Environmental Policy Act (NEPA) of 1969 (Pub. Law 91-190, 83 Stat. 852) (USC, 2003a) and the agency's NEPA-implementing regulations. Second, it demonstrates that the environmental protection measures proposed by LES are adequate to protect both the environment and the health and safety of the public.

LES has prepared this ER to meet the requirements specified in 10 CFR 51, Subpart A, particularly those requirements set forth in 10 CFR 51.45(b)-(e) (CFR, 2003a). The organization of this ER is generally consistent with the format for environmental reports recommended in NUREG-1748, Environmental Review Guidance for Licensing Actions Associated with NMSS Programs, Final Report August 2003 (NRC, 2003a).

This ER evaluates the environmental impacts of the LES proposed facility. Accordingly, this document discusses the proposed action, the need for and purposes of the proposed action, and applicable regulatory requirements, permits, and required consultations (ER Chapter 1, Introduction of the Environmental Report); considers reasonable alternatives to the proposed action (Chapter 2, Alternatives); describes the proposed NEF and the environment potentially affected by the proposed action (Chapter 3, Description of the Affected Environment); presents and compares the potential impacts resulting from the proposed action and its alternatives (Chapter 4, Environmental Impacts); identifies mitigation measures that could eliminate or lessen the potential environmental impacts of the proposed action (Chapter 5, Mitigation Measures); describes environmental measurements and monitoring programs (Chapter 6, Environmental Measurements and Monitoring Programs); provides a cost benefit analysis (Chapter 7, Cost Benefit Analysis); and summarizes potential environmental consequences (Chapter 8, Summary of Environmental Consequences). A list of references and preparers is also provided in Chapter 9, References, and Chapter 10 List of Preparers, respectively.

The effective date of this ER is December 2003.
