SUBJECT: G.E. MORRIS INTEGRATED INSPECTION PLAN-FISCAL YEAR (FY) 2007

Dear Mr. Monetta:

Pursuant to Manual Chapter 2690 B, "Inspection Program Guidance For Away From Reactor Site Independent Spent Fuel Installations [ISFSIs]," the NRC Region III staff and management have developed an Integrated Inspection Plan (IIP) for G.E. Morris. The plan is based on your current activities associated with monitoring the wet storage of spent fuel. The plan outlines how we intend to focus our Regional inspection resources to address any ongoing activities at the G.E. Morris facility for the period of April 2007 through September 2007.

Because the IIP is based, in part, on your proposed schedule of activities for the remainder of FY2007, the plan and the focus of NRC inspection activities may change to reflect any changes in your planned activities or your performance. In order to ensure that the FY2005 IIP remains current, we request that you keep the Decommissioning Branch staff informed of any significant changes in your proposed schedule of activities.

The following is an outline of FY2007 IIP, including the applicable inspection procedures. Due to the limited amount of significant activities planned in FY2007, it is our intent to conduct two onsite inspections during the remainder of FY2007.

| <u>Inspection Procedure #</u> | <u>Inspection Procedure Title</u> |
|-------------------------------|---|
| 60855 | Operation of an Independent Spent Fuel Installation |
| 81001 | Independent Spent Fuel Storage Installations" (Security Requirements) |

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

C. Monetta
