RE: CorScan Imaging  
Amendment Request - Transfer of Ownership  
License Number: 32-31038-01

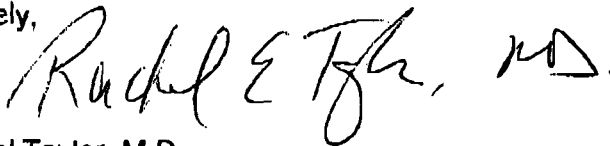

Dear License Reviewer:

As a requirement of the above referenced transfer, I hereby attest to the fact that Judith A. Rippert, D.O., who was named in the original submission letter as the Radiation Safety Officer for Delaware Heart & Vascular, P.A., is duly qualified and capable to uphold the responsibilities of Radiation Safety Officer as outlined in the guidelines prepared by the NRC.

She is specialty trained and boarded from the Certified Council of Nuclear Cardiology and has completed Basic Science training at Temple University. In addition, she has worked closely in conjunction with me in the Nuclear Cardiology Lab at Kent General Hospital for three years. I support and recommend her appointment as Radiation Safety Officer for Delaware Heart & Vascular, P.A.

If you have any questions regarding this attestation statement, please free to contact me at (302) 744-7062. Your consideration of this appointment is appreciated.

Sincerely,

Rachael Taylor, M.D.  
Radiation Safety Officer  
Kent General Hospital  
Department of Radiology  
Head of Nuclear Medicine
