REGION 1

Subject: Amendment to License 07-13441-02

Dear Sir or Madam:

I am writing to request an amendment to our Stine-Haskell Research Center license (License No. 07-13441-02) to make the following changes:

- Addition of Kr-85, any form, with a maximum radionuclide amount of 50 millicuries (mCi) as a separate line item within Sections 6, 7, and 8 of the aforementioned license

We have several upcoming research projects that will require Kr-85 as aerosol neutralizers. Our current license condition limits us to 10 millicuries total for Kr-85. Acquisition of these additional neutralizers will cause us to exceed this license limit.

Please contact me at 302-366-5062 (office) or 302-218-2461 (cell) should you have any questions regarding this amendment request.

Sincerely,

Michael B. Ohm
Radiation Safety Officer
