SUBJECT: SENIOR REACTOR OPERATOR RE-TAKE EXAMINATION MCGUIRE
NUCLEAR STATION - 05000369/2007302 AND 05000370/2007302

Dear Mr. Peterson:

In a phone conversation on April 18, 2007, between Mr. Robbie Pope, Operations Initial Training Supervisor, Mr. Wiley Kilette, Operations Initial Examination Team Lead, and Mr. Bruno Caballero, Operations Engineer, arrangements were made for the administration of a re-take licensing examination at McGuire Nuclear Station on June 28, 2007.

As agreed during the conversation, your staff will prepare the written examination based on the guidelines in Revision 9 of NUREG-1021, "Operator Licensing Examination Standards for Power Reactors." Your staff has also agreed to make all of the copies of the examination materials prior to administration. The NRC regional office will discuss with your staff any changes that might be necessary before the examination is administered.

To meet the above schedule, it will be necessary for your staff to furnish the examination outline by April 25, 2007. The written examination and the supporting reference materials identified in Attachment 2 of ES-201 will be due by May 21, 2007. Pursuant to 10 CFR 55.40(b)(3), an authorized representative of the facility licensee shall approve the outline and examination before they are submitted to the NRC for review and approval. All materials shall be complete and ready-to-use. Any delay in receiving the required examination and reference materials, or the submittal of inadequate or incomplete materials, may cause the examination to be rescheduled.

In order to conduct the requested written examination, it will be necessary for your staff to provide adequate space and accommodations in accordance with NUREG 1021, ES-402, "Administering Initial Written Examinations." Appendix E of NUREG 1021, "Policies and Guidelines For Taking NRC Examinations," contains a number of NRC policies and guidelines that will be in effect while the written examination is being administered.

To permit timely NRC review and evaluation, your staff should submit the preliminary senior reactor operator license application (Office of Management and Budget (OMB) approval number 3150-0090), medical certification (OMB approval number 3150-0024), and waiver requests (if any)(OMB approval number 3150-0090) at least 30 days before the examination date. If the application is not received at least 30 days before the examination date, a postponement may be necessary. The signed application certifying that all training has been completed should be submitted at least 14 days before the first examination date.
