In the Matter of

AMERGEN ENERGY COMPANY, LLC

(License Renewal for Oyster Creek Nuclear  
Generating Station)

Docket No. 50-0219-LR

ASLBP No. 06-844-01-LR

April 23, 2007

**NOTICE**

(Notice of Opportunity to Make Oral or Written Limited Appearance Statements)

This proceeding concerns the July 22, 2005 application by AmerGen Energy Company, LLC ("AmerGen") to renew its operating license for the Oyster Creek Nuclear Generating Station ("Oyster Creek") for twenty years beyond the current expiration date of April 9, 2009. In response to the September 15, 2005 Notice of Opportunity for Hearing (70 Fed. Reg. 54,585 (Sept. 15, 2005)), two Requests for Hearing and Petitions to Intervene were filed on November 14, 2005. One Petition was filed by the New Jersey Department of Environmental Protection [hereinafter referred to as New Jersey], and the other Petition was filed by the Nuclear Information and Resource Service, Jersey Shore Nuclear Watch, Inc., Grandmothers, Mothers and More for Energy Safety, New Jersey Public Interest Research Group, New Jersey Sierra Club, and New Jersey Environmental Federation [hereinafter referred to collectively as Citizens]. On December 9, 2005, this Atomic Safety and Licensing Board was established to preside over the proceeding.

On February 27, 2006, this Board issued a Memorandum and Order in which we (LBP-06-07, 63 NRC 188 (2006)): (1) denied New Jersey's Request for Hearing and Petition to

Intervene;<sup>1</sup> and (2) granted Citizens' Request for Hearing and Petition to Intervene. We concluded that Citizens' contention was admissible to the extent it challenged AmerGen's aging management program for measuring corrosion in the sand bed region of the drywell liner (*id.* at 217).

Subsequently, on June 6, 2006, this Board issued a Memorandum and Order in which we concluded that Citizens' contention, as admitted by the Board, was a contention of omission that had been cured as a result of newly docketed commitments by AmerGen to perform periodic UT measurements in the sand bed region of the drywell liner throughout the period of extended operation (LBP-06-16, 63 NRC 737 (2006)). Instead of dismissing the proceeding, the Board gave Citizens the opportunity to file a new contention raising one or more specific substantive challenges to AmerGen's new periodic UT program for the sand bed region (*id.* at 744). On June 23, Citizens submitted a Petition to file new contentions, and on October 10, this Board admitted one of the newly proffered contentions; namely, Citizens' assertion that AmerGen's scheduled UT monitoring frequency in the sand bed region of the drywell shell during the renewal period is insufficient to maintain an adequate safety margin (LBP-06-22, 64 NRC 229, 240-44 (2006)).

This Atomic Safety and Licensing Board hereby gives notice that, in accordance with 10 C.F.R. § 2.315(a), the Board will entertain oral limited appearance statements from members of the public in connection with this proceeding at the date, time, and location specified below.

---

<sup>1</sup> Although New Jersey established standing, the Board concluded that it failed to proffer an admissible contention. The Nuclear Regulatory Commission sustained the Board's ruling. CLI-07-08, 65 NRC \_\_ (slip op.) (Feb. 26, 2007); CLI-06-24, 64 NRC 111 (2006).
