RE: Docket # 03036495
Control # 139613
License # 45-30876-01

Dear Mr. Thompson;

This letter is in response to your inquiry of 1/4/2007 regarding Jefferson Cardiovascular Diagnostics License Amendment.

- A. Description of transaction. The transaction was a merger not a transfer. All stocks/assets were ceded to the "new" practice. The original entity (Jefferson Cardiovascular Associates) has been dissolved.
- B. There have been no personnel changes.
- C. Changes in location, etc. The practice relocated to a new building and address. There was no change in equipment or procedures relating to the licensed program.
- D. The surveillance program at the previous practice (J.C.A.) was terminated and the closing surveys were submitted. The surveillance program based on the previous model and methods was instituted at the new practice (C.A.C) at the time of the merger.
- E. All decommissioning records were forwarded to the NRC.
- F. The transferee (C.A.C) will comply with all commitments, conditions, constraints and requirements of the transfer.

Sincerely,

Michael B. Stock, CNMT ARRT(N)
