Subject: Grant no. NRC-06-05-303  
Formerly Licensed Sites SA-1000  
Progress report April 1, 2006,  
through September 30, 2006

This letter provides a progress report and description of this agency's activities for the period April 1, 2006, through September 30, 2006, at the George E. Davis (Gateway, Colorado) mill site, U.S. AEC license R-00215 (formerly R-00170), project grant no. NRC-06-05-303.

During the reporting period this agency, through its contractor and subcontractors, completed all excavation and disposal of contaminated materials that were possible within the funding limitations of the project grant, and all sample collection, on-site surveys, laboratory analysis and data reduction that are required to complete the final project report. The final project report is to be delivered in October 2006.

I will rely on you to forward copies of this report to NRC personnel who require them in order to process our pending SF 270 cash requests. If you have any questions, please contact me at 303 692-3423.
