Subject: Additional information for NRC amendment request for Lewisburg Cancer Center, mail control 140261

Licensee: Lewisburg Cancer Center
License No.: 37-31144-01
Docket No.: 03037182
Mail Control No.: 140261

To: Weimin Chen, Ph.D.

Please provide the following additional information to support the amendment request to add Cong (Alex) Chen as Authorized Medical Physicist (AMP). You may provide this information by fax to my attention at 610-337-5182, referencing mail control 140261.

Please send an e-mail to confirm that you received this message.

- 1) Copy of transcript from Dr. Alex Chen's US-earned graduate degree: M.S. in Environmental Engineering from Vanderbilt University.
- 2) Clarification of the range of dates and locations for Dr. Alex Chen's work with you to meet the requirement for one year of full-time training in medical physics and additional one year of full-time supervised work experience. The application listed experience at Harrisburg Cancer Center from 2003-2005 and Lewisburg Cancer Center from 2005-current. Provide the month and year when Dr. Alex Chen first worked under your supervision, and the address/NRC license for any locations other than Lewisburg Cancer Center.
- 3) Description of the one year of full-time training, for example, any formal coursework in medical physics. (The other amendments I've done with you recently to add AMPs were all for individuals with formal training in medical physics--degrees or residencies. It's unclear if Dr. Alex Chen has had any formal training in medical physics. If no formal training, please describe what substituted for this, such as individual courses, textbooks used, laboratory exercises.)
- 4) Documentation of Dr. Alex Chen's training in HDR hands-on device operation and safety procedures, for example, provide a copy of a vendor training certificate.

Thank you for your assistance. As always, please feel free to contact me by e-mail or telephone if you have any questions.

Sandy Gabriel, Ph.D.
Senior Health Physicist
Medical Branch
NRC Region I
