Subject: RAI, Iodine sampling procedures

(NOTE: This will be used as the Documents Title in ADAMS)

Summary: The question 3e of my March 22, 2007 letter was not answered. This concerned procedures for measuring the concentration of radioiodine from the hoods where material is stored. Mr Valenzano said that he would contact the RSO, Scott Dennerlein.

Scott Dennerlein contacted me on 5/1/2007 at 10:12 AM in which I restated the question. He said that most of the activity would be in storage waste and he would take that into consideration when submitting the procedures.

Action Required: The RSO will send in the procedures.
