RE: Amendment to our licenses  
Items 2 and 10

Dear Kathy,

Underwood Engineering Testing Company, Inc. has moved from 3 South Black Horse Pike, Mt. Ephraim, NJ 08059. Our new address and permanent storage area for the nuclear gauges is 143 Harding Ave. Bellmawr, NJ 08031. All other items in our Material License will remain the same. I have enclosed a copy of all leak tests for our troxlers, which cover the dates of our move to show that no contamination has taken place during our move.

Based on our leak test records and surveys performed with our survey meters monitor 4/4cc and Troxalert 3105, it has been determined that the source materials have remained sealed and our equipment and previous location have not been contaminated throughout our residency at that location.

Any further information that is needed, please feel free to contact me at 856-933-1818.

Respectfully submitted,  
**Underwood Engineering  
Testing Co., Inc.**

Patricia Bemederfer, RSO  
Director Testing & Inspection
