Subject: USNRC Docket No. 72-1014
HI-STORM 100 Certificate of Compliance 1014
HI-STORM Final Safety Analysis Report Update per 10 CFR 72.248(c)(6)

Reference: 1. Holtec Project 5014
2. Holtec Letter 5014593 dated April 10, 2006

Dear Sir:

Holtec letter 5014593 (Reference 2) submitted HI-STORM FSAR Revision 3 and 4, in accordance with 10 CFR 72.248(c)(6). 10 CFR 72.248(c)(6) requires that an update is filed every 24 months from the date of the issuance of the CoC. With an initial certification date of June 1, 2000, the next update would have been due by June 1, 2006. Since FSAR Rev. 4 contained all implemented changes at the time of its submittal, it was still a valid update in June 2006 in respect to the 6 month period specified in 10 CFR 72.248(c)(7). Therefore, no further revised FSAR was planned to be submitted in June 2006, only a certification that no changes were made. However, that certification was not submitted at that time. The current letter serves to certify that FSAR Rev. 4, submitted in April 2006, was still valid in June 2006.

The next update in accordance with 10 CFR 72.248(c)(6) will be provided in May or June 2008. This way, submittals will be re-aligned with the 24 month schedule based on the initial certification date.
