Mr. Don Harmon
Source and Special Nuclear Materials Branch
Division of Materials Licensing
United States Atomic Energy Commission
Washington, D. C. 20545

For Div. of Compliance

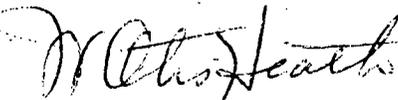

Dear Mr. Harmon:

Please refer to our application of March 20, 1970, for amendment of AEC Source Material License No. STB-527.

At that time we requested our license to be amended to include our Ludington plant, however, since then we have decided to postpone the project in Ludington. When this project is re-opened at some future date, we will then file for an amendment to our AEC license.

The main reason for this postponement is because we have not decided whether Ludington, Michigan; Midland, Michigan; or Freeport, Texas would be the most advantageous to Dow.

Yours very truly,

W. Otis Heath
Corporate Statistician
