Re: Mail Control #140346

In reference to our request for an amendment to our NRC license, we would like to clarify the request for a change in inventory procedure. We request that our non-sealed sources be inventoried on an annual basis. Our sealed sources (currently only one in possession) will continue to be inventoried on a six month interval.

Thank you for your consideration in this matter.

Sincerely,

Jay D. Strieb, Ph.D.  
Radiation Safety Officer, Villanova University
