Subject: Invitation to Briefing at Indian Point Mar. 08

VIA EMAIL

February 26, 2007

Dear Sir,

Please accept this invitation to an informational meeting at the Indian Point Energy Center regarding our groundwater investigation and other topics of interest to the community. The meeting will be held at the Indian Point Energy Center's Generation Support Building on March 8, 2007.

The groundwater briefing will summarize the steps Entergy has taken to characterize the flow of groundwater at Indian Point, establish a monitoring program and reduce the concentration levels of radionuclides. Mr. Don Mayer, director special projects and Mr. Jay Adler, project manager for the groundwater investigation, will summarize the results of the investigation thus far and highlight the next steps to be taken.

Entergy will also discuss the status of other projects such the dry cask storage project and siren replacement project.

We are extending this invitation to local, state and federal officials and emergency management professionals in the four county Emergency Planning Zone. Representatives from the Nuclear Regulatory Commission will also be attending.

While Entergy has used a number of means to let citizens know what is happening at the site, we recognize that there is no substitute for a face-to-face discussion.

The program will begin at 8:30 a.m. with badging at the access office located in the Emergency Operations Facility at the main entrance to Indian Point. The groundwater briefing will be held on the first floor of the Generation Support Building.

Our security procedures require all our visitors to complete an access authorization form. A copy of the form is attached and should be returned to Kathleen McMullin via fax at 914-827-7779 by March 6.

I hope you will be able to attend and I look forward to answering your questions.

Sincerely yours,

Fred Dacimo
Vice President Indian Point Energy Center
