Subject: Administrative Amendment 30 to GESTAR II to Implement the Referencing of NEDC-33173P, Applicability of GE Methods to Expanded Operating Domains

Enclosed is an administrative amendment to GESTAR II which implements the referencing of NEDC-33173P, Applicability of GE Methods to Expanded Operating Domains. Section 8.6 of the NRC Safety Evaluation for NEDC-33173P includes a requirement to incorporate NEDC-33173P-A into GESTAR II. Only Sections S.5 and S.6 are affected by the amendment. The enclosure presents a change to Section S.5.2 of the US Supplement to GESTAR II, shown in revision mode to ease the review. The specific dates on the GESTAR II and NEDC-33173P references will be added when the final SE is published and incorporated in the LTR.

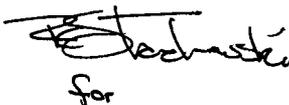

It is requested that the Safety Evaluation (SE) for this Amendment be issued prior to or concurrent with the SE for NEDC-33173P such that GESTAR II may be referenced by EPU and MELLLA+ plants which include NEDC-33173P in their licensing basis.

The header on the enclosure shows it as being GNF Proprietary because it is part of a larger document. However, there is no Proprietary information in this portion of GESTAR II.

One unrelated administrative change was also included. During the verification of the changes for the NEDC-33173P reference it was noted that the Hope Creek LOCA analysis reference was out of date. The correct Hope Creek SAFER/GESTR-LOCA reference added.

If you have any questions about the information provided here, please contact me at (910) 675-5954 or Jim Harrison at (910) 675-6604.

Sincerely,

for
