2443 WARRENVILLE ROAD STE 210  
LISLE, ILLINOIS 60532-4352  
MAY 14 2007

Thomas M. Lashley, RSO  
Detroit Edison Company  
Fermi 2 Power Plant, 100 AIB  
6400 North Dixie Highway  
Newport, MI 48166

Dear Mr. Lashley:

Enclosed is Amendment No. 11 to your NRC Materials License No. 21-02335-12, in accordance with your request. Please note License Condition 8.A. now includes a possession limit. This possession limit is based on your request following our telephone conversation May 14, 2007, in accord with NRC policy, in support of security issues. This amendment also includes some minor modifications to License Condition 13.D., involving leak test criteria, in accord with our current standard conditions. Please note that the changes made to your license are printed in **bold font**.

Please review the enclosed documents carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability. The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf> and the link for frequently asked questions regarding protection of security related sensitive information may be located at: <http://www.nrc.gov/reading-rm/sensitive-info/faq.html>. A copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly

T. M. Lashley
