Dr. Jill Lipoti
Director, Division of Environmental
Safety and Health
P.O. Box 424
Trenton, NJ 08625-0424

SUBJECT: OYSTER CREEK DRYWELL INDEPENDENT REVIEW FINDINGS

Dear Dr. Lipoti:

We received your letter dated April 26, 2007, in which you forwarded to me a copy of the New Jersey Department of Environmental Protection's independent review findings of the Oyster Creek Generating Station drywell shell.

Thank you for the copy of your expert's report and your comments regarding the report. As you are aware, the U.S. Nuclear Regulatory Commission (NRC) staff have been evaluating and monitoring the condition of the Oyster Creek drywell since the original discovery of the corrosion in the 1980's. We recognize and appreciate your strong interest in this technical issue and your commitment to the safe operation of this plant.

We have placed your letter and the report into our publicly available Agencywide Documents Management System with the accession number of ML071220069. As you are aware, this document and other information on license renewal is available on NRC's public website at <http://www.nrc.gov/reactors/operating/licensing/renewal.html>.

Thank you once again for providing us with this report.

Sincerely,

/RA/

Pao-Tsin Kuo, Director
Division of License Renewal
Office of Nuclear Reactor Regulation
