Radiation Safety Officer
553 Old Corvallis Road
Hamilton, Montana 59840-3131

SUBJECT: LICENSE AMENDMENT

By letter dated June 8, 2006, GlaxoSmithKline Biologicals - Hamilton (GSK) notified the U.S. Nuclear Regulatory Commission (NRC) of their intent to decommission and demolish the outdoor facility identified as Building 7, located on the property at 553 Old Corvallis Road, Hamilton, Montana. GSK's historical site assessment documented that Building 7 had been used for storage and decay of radioactive materials since 2004. Included in the letter of intent, was the final status survey report for Building 7. The NRC performed a confirmatory survey on August 3, 2006. The confirmatory survey was issued as an inspection report on August 25, 2006. The confirmatory survey supported GSK's final status survey report, which documented there was no radiation or contamination which was distinguishable from accepted background radiation levels. Based on these conclusions no further remediation or actions with respect to NRC regulated material at Building 7 is required. Therefore, please find enclosed Amendment No. 21 to License No. 25-19852-01, authorizing the release of Building 7, located on the property at 533 Old Corvallis Road, Hamilton, Montana, for unrestricted use in accordance with 10 CFR 20.1402, "Radiological criteria for unrestricted use."

An Environmental Assessment (EA) was performed in accordance with 10 CFR Part 51 and published in the Federal Register on May 17, 2007 (72 FR 27858). On the basis of the EA, the NRC concluded there were no significant environmental impacts from the proposed license termination and therefore, determined not to prepare an environmental impact statement for the proposed license termination. A copy of the EA is enclosed for your records.

You should review this license amendment carefully and be sure that you understand all conditions. If you have any questions, please contact me at 817-276-6552.

NRC's Regulatory Issue Summary (RIS) 2005-31, provides criteria to identify security-related sensitive information and guidance for handling and marking such documents. This ensures that potentially sensitive information is not made publicly available through NRC's electronic document system (ADAMS). Pursuant to NRC's RIS 2005-31, the enclosed materials license will not be made publicly available.

NRC expects licensees to conduct their programs with meticulous attention to detail and a high standard of compliance. Because of the serious consequences to employees and the public that can result from failure to comply with NRC requirements, you must conduct your radiation safety program according to the conditions of your NRC license, representations made in your license application, and NRC regulations. In particular, note that you must:

1. Operate by NRC regulations 10 CFR Part 19, "Notices, Instructions and Reports to Workers: Inspection and Investigations," 10 CFR Part 20, "Standards for Protection Against Radiation," and other applicable regulations.
2. Notify NRC in writing of any change in mailing address.
3. Request and obtain a license amendment before you:
 - a. Change Radiation Safety Officers;
 - b. Order byproduct material in excess of the amount, radionuclide or form authorized on the license;
 - c. Add or change the areas or address(es) of use identified in the license application or on the license; or
 - d. Change the name or ownership of your organization.

NRC will periodically inspect your radiation safety program. Failure to conduct your program according to NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC may result in enforcement action against you. This could include issuance of a notice of violation; imposition of a civil penalty; or an order suspending, modifying, or revoking your license as specified in the NRC Enforcement Policy. The NRC Enforcement Policy is available on the following internet address:

<http://www.nrc.gov/what-we-do/regulatory/enforcement/enforc-pol.pdf>.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this cover letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible on the following internet address:

<http://www.nrc.gov/reading-rm/adams.html>.

Thank you for your cooperation.

Sincerely,

/RA/
