## Item 10 - Radiation Safety Program

We will either possess and use, or have access to and use, a radiation safety meter that meets the Criteria in the section entitled "Radiation Safety Program – Instruments" in NUREG-1556, Vol. 1, Rev. 1, dated November 2001.

Physical inventories will be conducted at intervals not to exceed six months, to account for all sealed sources and devices received and possessed under the license.

instructions. The leak test shall be capable of detecting the presence of .005 microcurie of radioactive material on the test sample. The test shall be taken from the surfaces of the device in which the foil is mounted or stored on which one might expect contamination to accumulate. Records of the leak test results shall be kept in units of microcuries and maintained for inspection by the Department. If the test reveals the presence of .005 microcurie or more of removable contamination, the licensee shall immediately withdraw from use and shall cause it to be decontaminated and repaired or to be disposed of in accordance with department regulations.

We will implement and maintain procedures for routine maintenance of our gauges according to the manufacture's recommendations and instructions.

We will send the gauge to the manufacturer or other person authorized by the NRC or an Agreement State to perform non-routine maintenance or repair operations that require the removal of the source from the gauge.
