Document_Title: NUREG 1122, Knowledge and Abilities Catalog for Nuclear Power Plant Operators Pressurized Water Reactors
 NUREG 1123, Knowledge and Abilities Catalog for Nuclear Power Plant Operators Boiling Water Reactors

Comments: I have the following recommendation on wording changes in the Generic Section - Section 2 for both the PWR and BWR catalogs. These changes will make the two KAs more compliant with new reactor plant designs.

KA 2.1.45

Currently states "Ability to identify and interpret diverse indications to validate the response of another indicator."

Recommend changing the last word to "indication". The KA would then read as: "Ability to identify and interpret diverse indications to validate the response of another indication."

KA 2.2.4

Currently states "(multi-unit license) Ability to explain the variations in control board layouts, systems, instrumentation, and procedural actions between units at a facility."

Recommend changing the word "board" to "room". The KA would then read as: "(multi-unit license) Ability to explain the variations in control room layouts, systems, instrumentation, and procedural actions between units at a facility."

I do not believe that these changes the intent of the KA therefore, no re-rating of the KA would be required.
