TO: Ms. Pam Henderson, Nuclear Regulatory Commission
FROM: Stephen McGill, Supervisor of Nuclear Medicine
License No. 37-16335-01
Docket No. 03010837
Mail Control Number 140524
RE: Close Out Survey Follow-Up
DATE: June 4, 2007

Ms. Henderson:

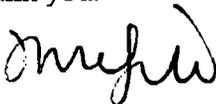

Thank you for speaking with me on the telephone today. I will attach correspondence from Pennsylvania's Radiation Protection Program representatives who performed radiation measurements that supplemented our own. Their findings indicated that no fixed or removable contamination was present in the area that is awaiting unrestricted status. This document may or may not be helpful to the Nuclear Regulatory Commission.

We are in receipt of a post card from the NRC, Mail Control Number 140524, which noted that no administrative omissions were in our letter of May 10, 2007.

The demolition and construction teams here at our facility are most enthusiastic about beginning their efforts following your authorization. We stand ready to accept your inspection and/or release of this area.

If you have any questions, please do not hesitate to call me at 717.633.8831 or Wendy Charlton, our Health Physics Consultant at 410.665.5447

Thank you.

Hanover, Pa. 17331

Re: License No. PA-0032
Hanover, York County,

Dear Mr. McGill,

On May 30, 2007, Messrs. Roy G. Kitzer and Gerry Dworsak conducted a Confirmatory Closeout Radiation survey of your relocated Nuclear Medicine Suite. We are pleased to inform you that our Radiation Measurements for both fixed and removable contamination were less than or equal to the instruments background, and that this area is acceptable for unrestricted use.

Thank you for your cooperation.

Sincerely,

Stephen E. Williams
Stephen E. Williams
