Materials Engineering & Testing
a Rockwood Company

May 18, 2007

Scott Moore, Deputy Director
Division of Materials and
State Agreements Office of Federal and State Materials
And Environmental Management
U.S. Nuclear Regulatory Commission
Washington DC 20555-0001

Dear Mr. Moore:

I spoke with Ms. Vivian Campbell in Region IV regarding my request to arrange for the NRC to provide a speaker at the 2008 Non Destructive Management Association (NDTMA) Conference. The NRC has provided a speaker for this annual conference for the past several years and has been regarded as essential for the industrial radiography industry.

Last year, Mr. John Jankovich with the USNRC gave the presentation. Normally, the conference is held the second week in February, but as the Regulatory Session Chairman, it is my responsibility to provide the speakers (3-presentations) for the session to the Board of Directors by mid-June.

The overall consensus of the members (over 300) needing information relative to the implementation of the Increased Controls Security requirements.

I wish to request the USNRC provide a speaker that can give a presentation relevant to the IC Order (approx 30 minutes) and be able to answer questions from the attendees at the conclusion of the presentation.

I greatly appreciate any assistance that you can provide in this matter, and look forward from hearing from you soon. Please feel free to contact me at any time at (281) 842-3350 or by email at lgray@acuren.com.

Best Regards,

Lloyd A. Gray, Director
