Subject: IPEC Groundwater Hydrology Discussion

We appreciate the good discussion regarding the recovery well pump test report on January 8, 2007. Based on some of the information that was learned from that test, several hydrologists expressed the opinion that it would be prudent to discuss the future tracer tests and the site characterization strategy to-date. We would appreciate your attendance in a telephone conference on January 25, 2007 from 10:00-11:00 am. Please call: 800-638-8081 followed by the passcode: [redacted] We would appreciate a quick summary of the planned tracer test and current site characterization strategy by GZA followed by comments from the participating hydrologists. Look forward to hearing from you on Thursday.

Regards,

Jim
