Thank you, Tim. I made this change, and attached the revised agenda. Please let me know if you would like me to make any changes to your name.

Putting my name in would be fine. Most of the stakeholders know me by now, so it's probably a good idea to emphasize our involvement in this particular breakout session.

Thanks,  
Tim

Tim:

Would you like me to list DEC on the agenda as part of the Breakout session on Groundwater Contamination? If so, shall I list your name or just the DEC in general?

Marjorie

Marjorie,,

All three e-mails came through from you all at once. John was probably correct. Our system has a limit on it for attachment size.

Thanks,  
Tim

Tim:

Information in this record was deleted  
in accordance with the Freedom of Information  
Act, exemptions 6  
FOIA- 2007-0166

I will try this a third time. John suggested that the attachments I am sending you are making the message too large, and that may be the problem. I will send you the 3 attachments one at a time. Please look at my original message below, and I will send you the poster and the slides separately.

Tim:

When I sent this to you this morning, it came back to me as undeliverable. I am trying again, and hope it goes through.

Tim:

Good morning. We're happy to have you participate in any manner you like. I attached a copy of the meeting agenda. The meeting will consist of 2 major portions: presentations and posterboard sessions. The presentations will consist of the following topics: Plant performance, the license renewal process, and a few words from representatives of the EPA (Region II). Following each NRC presentation, we will allow for questions from the attendees. The Q/A time is built into the time allotted each presentation. After all of that, we will move into the posterboard sessions. Each table has at least 1 poster that has some general information about the subject topic. NRC staff (and DHS at one table) will man the tables to answer 1-on-1 questions. Many will also have handouts.

For the Groundwater table, we have 2 posters. I only have one electronically, and I attached that below (it is the slide titled "groundwater"). The other shows the hydrology of the site, I believe.

At that table, we also will have a laptop set up, and have a few informational slides. I attached those as well (this is the PPT attachment titled "Groundwater Contam"). Other than that, we will have

John White at the table to answer questions. He will be joined by Marsha Gamberoni, who will be the new Director of our Division of Reactor Safety at Region I. They will be there to answer questions.

I mentioned that the EPA is coming. Paul Giardina and Mike DeBois from the Region II office will be their representatives. They will not likely be a part of the Posterboard session. They will make remarks during the presentation part, and will be around to answer questions. Paul has to leave early, so he may not be there for most of the Posterboard part.

I hope that helps in your determination of what to bring. We will be arriving at the conference center by 07:00 to set up. You are welcome to come at that time to put some materials out on the table and join up with our staff. There also will be some time in between the presentations and posterboard sessions to set up, if you prefer.

Call me if you need anything further or have more questions.

VR,  
Marjorie

Marjorie,

You had asked if I would like to participate in the breakout for the groundwater contamination issue.

After talking this over with DEC administration, I would be happy to participate in that session.

Do you know what form it will take (Poster session, power point presentation, etc.) and what information will be presented, maps available, etc?

Based upon what is being presented I may decide to bring some material with me.

Thanks,
