Amendment Request Dated May 14, 2007

The licensee requested that Dr. Crooks (Ph.D.) be added to their NRC license; however, did not specify for what material. Since this is an HDR license, it is assumed that Dr. Crooks should be added as an AMP. The reviewer spoke to Willis Brumley, dosimetrist for the licensee who stated that Dr. Crooks was listed as an AMP on a previous amendment which the reviewer found to be amendment No. 01, attached. Also, the license was already marked SUNSI and since the mailing address contains a Suite No., the cover letter was also Marked. Also, the IC calculation shows that this license does not meet the IC ORDER criteria.

James Mullauer, 5/29/07
