

October 13, 2005

NOTE TO: Allegation File NRR-2005-A-0020

FROM: Julie Crutchley, NRR Allegation Assistant

SUBJECT: INITIAL ARB MEETING FOR NRR-2005-A-0020 THRU NRR-2005-A-0022

This allegation, which regards security issues discovered by ABC at several test/research reactors (RTRs), was originally a generic allegation under NRR-2005-A-0019. An emergency Allegation Review Board meeting was held for NRR-2005-A-0019 on August 26, 2005, during which three specific RTRs - Ohio State, University of Florida, and University of Wisconsin - were discussed.

After the ARB, NRR senior management requested that the NRR Allegation Team open new allegations for each affected RTR. The files were created and all cases were returned to the ARB on October 13, 2005 as initial ARB issues. However, the first three RTR issues listed above had already been given an initial ARB review, so the ARB held on October 13, 2005 was considered a followup review for them.

Therefore, this note should be regarded as a holder in the allegation file to show that the allegations mentioned in the ARB meeting on August 26, 2005, were given an initial ARB review on that date, under Allegation NRR-2005-A-0019, before they were broken into individual allegations. The new numbers for these allegations are:

- NRR-2005-A-0020 Ohio State
- NRR-2005-A-0021 University of Florida
- NRR-2005-A-0022 University of Wisconsin

For details on the ARB discussion, please see the ARB briefing sheet for NRR-2005-A-0019, which is attached to this note.
