Rancho Seco Nuclear Generating Station
License No. DPR-54

REPORT OF EMERGENCY PLAN CHANGE

Attention: John Hickman

In accordance with 10 CFR 50.54(q) and 10 CFR 50.4(b)(5)(ii), we are informing the NRC of Revision 4 to our Emergency Plan. Since Rancho Seco no longer conducts liquid effluent releases, Emergency Plan, Revision 4 reflects changes to the Offsite Dose Calculation Manual (ODCM) including the removal of liquid effluent radiation monitor R15017A.

Our 10 CFR 50.54(q) evaluation determined that these changes do not decrease the effectiveness of the emergency plan. Therefore, these changes can be made without prior NRC approval.

If you, or members of your staff, have questions requiring additional information or clarification, please contact me at (916) 732-4843.

Sincerely,

Robert E. Jones

Superintendent, Quality/Licensing/Admin.
