Subject: Termination of the excursion status for monitor well 5MW48.

Dear Mr. McConnell

This letter serves as notification that the excursion status for monitor well 5MW 48, in Mine Unit 5 at the Christensen Ranch Project has been terminated. The excursion initiated on April 25, 2007. Corrective pumping of one recovery well within the adjoining well field has been successful in reversing the excursion.

An excursion is considered ended when not more than one Upper Control Limit (UCL) is exceeded for 3 consecutive weekly samples. Well 5MW 48 met this criteria on May 23, 2007. The following table gives the analysis data from the last four weekly samples along with the respective UCL's.
